Annual Report 2017

CELEBRATING 25 YEARS

CESD

Competitive Edge Strategic Development

Homegrown leadership achieves global success

CESD is proud to be part of the new Manitoba landscape providing training, knowledge transfer and consultancy to support your company's rise.

FLEXIBLE SOLUTIONS FOR YOUR BUSINESS:

We understand Competitive Advantage and have worked with diverse clients to give them the practical tools they need to continuously improve and evolve to be contenders in the global marketplace. Our services can help make your evolution a structured journey with the focus you need to be successful. We believe in building sustained internal capability through focusing on a core list of functions:

• Leadership • Operations • Human Resources

25 YEARS OF EXCELLENCE

MESSAGE FROM THE BOARD OF DIRECTORS AND THE CEO

Wendell Wiebe

This has been a year of transition for Manitoba Aerospace Inc. On April 1, 2016, we started the fiscal year as one organization, where previously, we were two (Manitoba Aerospace Association & Manitoba Aerospace Human Resources Council). We consolidated the Boards of both organizations and welcomed a representative from the Provincial department of Industry Training & Employment Services to the Board of Directors.

With the merger of the two organizations, we added a new staff member, Loren Hendrickson, who is responsible for our focus on Innovation, Research and Technology. This position and its activities are funded by Consortium of Aerospace Research & Innovation Canada (CARIC).

We have developed four areas of focus: (1) Workforce Development; (2) Supplier and Economic Development, (3) Innovation, Research & Technology, and (4) Promotion, Branding & Advocacy.

Workforce Development includes training of existing workers, career development, career awareness and a new focus, leadership development. Leadership Development is a more recent activity which has been identified as part of our discussions with our member companies. With funding support from Industry Training and Employment Services, we have developed a methodology to help Small to Medium Businesses (SMBs) identify and develop their future leaders. We are actively looking for a SMB within the membership who would like to pilot this service.

Promotion of the local industry will continue under the leadership of the Marketing and Communications Committee. They will continue to focus on fund raising events (Golf Tournament and All Star Awards Dinner). Including the net proceeds from last year's two (2) fund raising events, our student endowment funds have reached $250,000.

In addition to fund raising, the committee continues to organize the activities for Aerospace week which includes collecting articles for the Winnipeg Free Press Supplement that profiles the local aerospace community and volunteering at the Aerospace & Aviation in Manitoba Day (AAiM Day). The committee continues to be responsible for publishing the Contrails Newsletter.

Manitoba Aerospace continues to advocate on behalf of the industry with all levels of Government. We also promote the industry at national and international trade shows. In 2016, Manitoba Aerospace participated in the Farnborough Air Show, the Abbottsford Defence and Security Expo (ADSE) and Aerospace Industry Association of Canada (AIAC) National Forum.

In March 2017, the AIAC Board of Directors approved Manitoba Aerospace's request to become an associate member of AIAC. This allows us to be present at AIAC Board meetings and represent member companies especially Small to Medium Businesses that do not have a representative on the AIAC Board of Directors.

Under the funding agreement from CARIC, we continue to develop opportunities for collaboration between industry and educational institutions to advance technologies and innovation to ensure our companies remain competitive in the global marketplace. This past year, Manitoba Aerospace Research & Technology Committee (MARTC) updated the Manitoba Aerospace Technology Road Map (TRM). One of the events in Aerospace Week will be to identify which of the thirty-three (33) priority themes Manitoba Aerospace companies will want to focus on.

Supplier and Cluster Development will work to boost the capabilities of SMBs by utilizing both the Competitive Edge Supplier Development (CESD) Program and the Industrial & Technology Benefits (ITB) project and we are establishing a stronger supply base in Manitoba. We had a total of twelve (12) companies participate in the ITB program, nine (9) Manitoba companies, two (2) from Alberta and one (1) from Saskatchewan. We will be scheduling three (3) Business to Business events in the fall of 2017 with OEMs or other Tier 1 obligors.

Over the past year, we have worked with the procurement departments at Boeing, Magellan & StandardAero to help determine their expectations of suppliers as well as some specific products and services they are seeking from local suppliers. During Aerospace Week, we are hosting our first Business to Business event to allow member companies to make a "pitch" to one or more of the "Big" Three..

We will to continue to look for business prospects for member companies to take advantage of opportunities, whether it be from the Federal Government Procurement process (Industrial & Technological Benefits program) or local opportunities from Boeing, Magellan and StandardAero.

Last summer, with the financial support of Industry Training and Employment Services, we hired a summer student who completed a Labour Market Information Survey of our member companies. In addition to collecting information on industry's need for new hires, we are better able to understand the economic impact of the industry. The survey indicated that in 2015, Manitoba Aerospace member companies generated $1.9 Billion in sales, of which 80% is exported. The industry purchased $412 Million from Canadian Suppliers, of which $103 Million was local. Our Supplier Development initiatives will increase the growth of products/services purchased locally. So, it has been a busy but productive year.

THE MANITOBA WAY

GROWTH OF AN INDUSTRY

Manitoba Aerospace is celebrating its 25th Anniversary as of April 1, 2017. It's amazing how far the organization has come. Manitoba Aerospace Human Resources Coordinating Committee owes its existence to a number of people but in particular Bob Knight, now retired from the Government of Manitoba and Bruce Clarke, retired from StandardAero. Bruce and Bob developed the idea of creating a sector council for the aerospace industry in Manitoba and Bob worked with colleagues in both the Provincial and Federal governments to "sell" the concept and Bruce advised and convinced his colleagues from industry to join. We are grateful for Bruce and Bob's collaboration.

Manitoba Aerospace Human Resources Coordinating Committee (MAHRCC), which later became known as Manitoba Aerospace Human Resources Council (MAHRC), had four Executive Directors: Johanna Faulk, D'Arcy Phillips, Vic Gerden, and Wendell Wiebe. Manitoba Aerospace Association (MAA) had four Executive Directors: Don Price, Ken Carr, Vic Gerden and Ken Webb. Each successive Executive Director of both organizations built on what had been accomplished by their predecessors. What follows is not a complete list of the all the accomplishments, but highlights key milestones in their various contributions.

MAHRCC

Johanna Faulk was the first Executive Director of MAHRCC, beginning April 1, 1992 with funding from both the Federal and Provincial Governments with a mandate to support the Manitoba aerospace industry in the training of their workforce. The priorities were to assist industry in up-skilling the current work force, as well as to establish permanent educational pathways to help people gain specific skills for jobs in the aerospace sector.

Faulk was directly involved in establishing partnerships with 3 key educational institutions: the Faculty of Engineering at the University of Manitoba, Red River College (RRC), and Tec Voc High School. Under her watch and in collaboration with Mel Symonds of Magellan Aerospace, an upgrading program was established so that 2nd year technology diploma students from RRC were able to complete the necessary course work and graduate with a Bachelor of Science Degree in Engineering from the University of Manitoba. A similar program at Red River College was then developed to allow industry employees to return to school on a part-time basis to get a diploma in Mechanical Engineering Technology.

D'Arcy Phillips was the 2nd Executive Director of MAHRCC and was instrumental in cultivating a highly effective focus on career awareness to assist youth, parents & teachers to become more aware of the local aerospace industry opportunities and the careers available. During his tenure, partnerships were established with organizations such as Career Trek, and Women in Science & Engineering (WISE at the U of Manitoba). Phillips, in collaboration with Barb Bowen, established the very successful Aerospace & Aviation in Manitoba (AAiM) Day.

This program annually brings over 700 Grade 6 students to Red River College -

2004 CAMC Forum

Stevenson Campus to involve them in hands on activities that introduce them to exciting careers and the educational pathways into aerospace and aviation.

Phillips also had the foresight to connect with the Indigenous community, and proactively engaged with the Centre for Aboriginal Human Resource Development (CAHRD) as a key educational partner. Over the years, this partnership has grown to include the establishment of the Aboriginal Aerospace Initiative. This program formalized aerospace training programs at CAHRD's Neeginan College and thereby established another source of skilled, entry level workers for the sector.

Phillips further formalized industry's connection with the educational partners by establishing committees whose mandates were to foster dialogue between the aerospace industry and various educational institutions. He facilitated the establishment of the Aerospace Engineering Liaison Group (AELG) with the Faculty of Engineering, the Strategic Council with Red River College - Stevenson Campus as well as with various Advisory Committees at Tec Voc High School and CAHRD.

Phillips enhanced the partnership with Tec Voc High School by collaborating with the Canadian Aviation Maintenance Council (CAMC) to establish the Aerospace & Aviation Maintenance Orientation Program (AMMOP). This is a 10 month program in which post high school students learn the basic skills that can lead to an exciting career in the aerospace industry. A similar program was subsequently created for Grades 10 to 12.

Phillips was also instrumental in helping the aerospace Industry to persuade the Government of Manitoba to establish the Winnipeg site of Red River College - Stevenson Campus. This was done, in part, to help the projected expansion of the Air Canada maintenance facility. He also worked closely with the University of Winnipeg and industry stakeholders to establish the Certificate in Management to Bachelor of Business Administration (CIM to BBA). This program allows managers and supervisors who have graduated from the Certificate in Management program to gain credits towards a university degree.

MAA

Don Price, the 1st Executive Director of the Manitoba Aerospace Association, collaborated with Jim Sawyer (then Chair of the MAA Board and General Manager of Boeing Winnipeg) to facilitate a local Supplier Development initiative. Boeing worked with Cormer Group Industries to become one of Boeing's local suppliers. Magellan followed suit by working with K&F Tool & Die to develop their own local supplier.

Ken Carr, the 2nd Executive Director for MAA, in collaboration with Sawyer launched the first Western Canadian Aerospace Conference in 1999. Carr, a former Snowbird pilot, secured an aircraft and flew Phillips on a trip for meetings in British Columbia, Alberta and Saskatchewan in order to establish the Western Canadian Aerospace Alliance. Manitoba hosted 3 more very successful Western Canadian aerospace conferences in 2005, 2009 and 2013. Phillips and Carr together helped establish the All Star Awards of Excellence in 2001. This annual event includes a dinner that raises funds for the Manitoba Aerospace Student endowment fund. Carr also established the Networking Breakfast meetings for member companies and created the Manitoba Aerospace Marketing Committee.

Vic Gerden, as the 3rd Executive Director, in collaboration with Phillips, put in place the Manitoba Aerospace Student Awards Endowment Fund. All profits from the annual Awards of Excellence gala dinner and from an annual golf tournament are contributed to the Endowment Fund.

Gerden also introduced a significantly expanded Supplier Development program based on international standards of excellence for global aerospace suppliers. With assistance from the Northwest Aerospace Alliance in the UK, their Aerospace Supply Chain Excellence program was adapted to the needs of Manitoba companies. Wendell Wiebe, the 4th Executive Director of MAHRC, worked in collaboration with Gerden to deliver the Manitoba Competitive Edge Supplier Development Program, one of only two aerospace supplier development programs in Canada.

Gerden also saw the opportunity for local Small & Medium Businesses (SMBs) to potentially benefit from the economic prospects emanating from major national defence procurement contracts, associated with the Federal Government's Defence Procurement Strategy. Wiebe has expanded this to include a series of workshops to help SMBs better understand the current Federal Government Procurement Process and the associated Industrial & Technological Benefits program. This has further re-enacted the local supplier development initiative to help Boeing, Magellan and StandardAero find local suppliers. Manitoba Aerospace will be hosting a Business to Business (B2B) event during the 2017 Aerospace Week (June 5-9).

MILESTONES

1992 - 1999

- AMMOP @ Tec Voc
- Aerospace Option @ UofM
- CAHRD partnership
- Teacher's Year in Industry @ Tec Voc
- Training of Existing Employees (TEE)

2000 - 2009

- Aboriginal Aerospace Initiative
- AAiM Day
- All Star Awards
- Aerospace Engineering Liaison Group (AELG)
- CareerTrek
- CIM to BBA
- Expansion of RRC - Stevenson Campus
- Metallurgical Processes
- New Hires Programs
- Student Awards
- Space Adventure Camp
- Contrails Newsletter
- Website

2010 - 2017

- CESD Program
- Golf Tournament
- Industrial Technological Benefit (ITB) Pilot Project
- New World Ideas
- Social Media Presence
- Technology Road Map (TRM)
- Manitoba Aerospace Research Technology Committee (MARTC)
- Local Supplier Development Initiative

2014 AAiM Day included Their Royal Highnesses The Prince of Wales and The Duchess of Cornwall

Gerden & Wiebe initiated the Manitoba Aerospace Golf Tournament, which is held in September annually. This is a major fund raising event that contributes all proceeds to the Manitoba Aerospace Student Endowment Fund. Scholarship endowments have been established at the University of Manitoba, Faculty of Engineering, Red River College (for both mechanical technology graduates and Aircraft Maintenance Engineering diploma graduates) and at the Winnipeg Foundation for awards to students from Tec Voc High School and Neeginan College. This past year, the fund reached $250,000. Hooray!

More Recently

Ken Webb, the 4th Executive Director of MAA, led Manitoba's participation in the national Canadian Aerospace Review and collaborated with industry and educational partners to develop The Manitoba Aerospace Technology Roadmap (2013). This initiative resulted in the identification and prioritization of important technologies of high interest to the economic future of the Manitoba aerospace industry and also led to the establishment of the Manitoba Aerospace Research and Technology Committee (MARTC). Webb also worked with the Consortium of Aerospace Research and Innovation Canada (CARIC) for MAA to host the CARIC Central (Manitoba and Saskatchewan) office and served as its first regional director. From 2010 to 2016, Gerden and Webb represented the combined four Western Canadian provincial Aerospace Associations on the Board of the Aerospace Industry Association of Canada (AIAC). As of 201, Manitoba Aerospace Inc became an AIAC member on its own.

Wiebe, in collaboration with Randy Hermann (Director of ENGAP at the University of Manitoba), Peter Jordan and Barb Bowen developed the New World Ideas project which produces videos and teachers' guides on Indigenous innovation. Two packages have been produced so far, the Birch Bark Canoe and the Three Sisters which highlights the contribution First Nations people have made to the cultivation of food in North America and beyond.

Wiebe, with support from John Kliewer, established CESD Services Inc. with the Board of Directors of Manitoba Aerospace as its lone shareholder. This business entity's mandate is to provide consulting services to organizations within the aerospace industry and beyond and the profit earned help to offset program delivery costs of Manitoba Aerospace that are not funded by government.

Each of these leaders have taken what was established and made it better as well as added more services to grow the aerospace industry in Manitoba.

In addition to the efforts of all the previous Executive Directors and their respective employees, we also need to recognize the significant contribution of all of the members of the Boards of Directors, and the Aerospace Marketing & Communications Committee. These volunteers are too numerous to name here but they assuredly put a great deal of time and effort into supporting our local aerospace sector. We also must acknowledge the strong support of both the Federal and Provincial governments. Other aerospace associations exist in regions across Canada but Manitoba's association continues to be the most robust because of the support of both levels of governments and the local industry. We would not be where we are today without their ongoing investment.

We are stronger together and we can just imagine where the next generation of leaders will take Manitoba Aerospace. The sky is the limit!

SUMMARY OF ACTIVITIES

PILLAR #1 WORKFORCE DEVELOPMENT

WORKFORCE DEVELOPMENT

Training of Existing Employees (TEE)

Manitoba Aerospace continued to support the training of existing employees (TEE) in FY 2016-17. Manitoba Aerospace supported organizational development activities to assist the industry's ability to remain competitive in the global aerospace marketplace. The majority of our activities this fiscal year supported leadership and senior management in developing the skill sets and systems they required to improve their organization's performance, and identify the future skills and training requirements of their workforce, using a systematic method.

Key Accomplishments:

- ***10 Manitoba Aerospace Industry training initiatives supported***
- ***66 Personnel received Manitoba Aerospace supported training, exceeding our goal by 10 persons***

Examples of Courses Manitoba Aerospace Supported for Industry:

- ***Strategic Business Planning (1 organization)***
- ***Deploying Strategic Plans Management Operating System (MOS) Installation (2 organizations)***
- ***Developing a Skills Matrix (2 organizations)***
- ***Leadership – Performance Coaching (3 organizations)***
- ***Problem Solving – Root Cause Analysis (1 organization)***
- ***Strategic HR Planning and Skills Development (1 organization)***

John Kilewer at the Business to Business (B2B) and Breakfast Meeting

LEADERSHIP DEVELOPMENT

Manitoba Aerospace received funding from the Province of Manitoba, Industry Training and Employment Services, to support a study of leading techniques and approaches to support organization in developing leadership. The study, conducted by Tarry and Associates, was received by Manitoba Aerospace in November 2016. The study made several conclusions, the results of which were presented at a Networking Breakfast April 27, 2017.

The conclusions included:

A) Three (3) Main Drivers for Leadership Development in industry: 1) Performance Review Gap, 2) Succession Planning, 3) Employee Feedback from Surveys.

B) Three (3) Main Methods Industry Organizations used to Identify Future Leaders: 1) Performance Review Results, 2) Manager / Supervisor Nomination, 3) Internal (Proprietary) Talent Management Systems.

C) Effective Leadership Development requires Leadership Infrastructure to support the organization's leadership training.

D) The vast majority of leadership training is designed, developed, and delivered internally.

E) Companies must provide sufficient time and financial resources to support each potential leader's journey of leadership experiences.

Manitoba Aerospace's strategy going forwards will be to assist organizations in developing Leadership Infrastructure. This includes: 1) The development of the organization is Vision, Mission, and Values. 2) The development of Leadership Values. 3) The development of Leadership Roles/Responsibilities. 3) The development of systems to measure Leadership Skill Gaps. 4) The development of Action Plans to address #3. 5) Development of Succession Planning System. 6) Determining and implementing Leadership Metrics. 7) Determining and implementing Leadership Recognition and Rewards.

CAREER DEVELOPMENT

Manitoba Aerospace partners with educational institutions at the secondary and post-secondary levels in order to ensure the continued flow of industry ready graduates from educational programs to support the aerospace sector. We have long-standing partnerships with: the Faculty of Engineering and the Engineering Access Program at the University of Manitoba, the Faculty of Business and Economics at the University of Winnipeg, Red River College – Stevenson Campus, Neeginan College of Applied Technology, and Tec Voc High School.

CAREER AWARENESS

Part of the mandate of Manitoba Aerospace is to ensure youth, parents, and educators are aware of the local aerospace industry and the great careers available in the sector. Manitoba Aerospace collaborates with a variety of community partners to ensure that Manitobans become more aware of aerospace careers and the established educational pathways to those careers. In 2016 – 2017, we interacted with 6,074 individuals which was 3,042 more than our planned number of 3,032,

2016-2017 Key Accomplishments of both Career Awareness and Career Development:

• AMMOP at Tec Voc has 33 students expected to graduate in June 2017.

• The Tec Voc program, Aviation and Aerospace Technologies has 18 students in Grade 12, 28 students in Grade 11 and 31 students in Grade 10

• Neeginan College of Applied Technology offers Gas Turbine Repair & Overhaul, CNC Machine Operators and TIG welding courses. 22 people graduated from CNC, TIG welding and CWB welding programs in the current program year.

• The Executive BBA program continues at the University of Winnipeg which gives prior learning credits to graduates from the Certificate in Management program towards a Bachelor of Business Administration.

• Manitoba Aerospace continues to work with other sector councils and other community partners during Career and Workforce Development Month (November 2016). We attended three different events and interacted with approximately 315 people.

• The 11th annual AAiM Day will be held at RRC – Stevenson Campus on May 26, 2017.

• Approximately 204 participants with Career Trek took part in aerospace/aviation related activities between October 2016 and March 31, 2017.

• The University of Winnipeg has launched a unique, industry-driven graduate program, the Masters in Management (MIM). The MIM, with a specialization in Technology, Innovation, and Operations, is a graduate level degree that focuses on developing innovative, critical thinkers at a senior management level. It is aimed at those with an undergraduate business degree who are seeking additional management credentials, including those already working in the managerial field.

• Manitoba Aerospace hosted a HIRED event and Meet and Greet at the Faculty of Engineering in November 2016. Over 200 students were involved in the two events with ten company representatives in attendance.

• There are 27 engineering students enrolled in the Aerospace Option as part of the Bachelor of Science in Engineering (Mechanical) at the University of Manitoba.

• 16 first year ENGAP students were hosted at StandardAero in August 2016 and 25 students attended the Lunch Information Session in February.

• The second annual Girls in Aviation Day was held at Lyncrest Airport in September 2016. Over 200 girls and parents were introduced to 7 different careers related to aviation and aerospace with 75 volunteers.

• Since April 2016, Manitoba Aerospace representatives attended various career fairs or facilitated information sessions and interacted with over 3424 students, teachers and parents.

PILLAR #2 SUPPLIER AND CLUSTER DEVELOPMENT

SUPPLIER DEVELOPMENT

Initiated in 2010, the Competitive Edge Supplier Development Program (CESDP) provides a framework to develop systems and processes which are considered "world class". The systems and processes that CESDP supports are those which OEMS, Primes, and Tier 1 & 2 companies consider as critical differentiators of potential suppliers. Competence in these critical differentiators allows suppliers to integrate with their customers, and allows for Manitoba companies to compete and win against the best in the world.

Key Accomplishments:

• One (1) organization completed a full review (Process Benchmarking) of their organization capabilities. The organization demonstrated ongoing improvement of their skills.

• Two (2) organizations participated in partial reviews (Process Confirmations) of their Leadership, Strategic Business Planning, Skills Planning and Development, and Innovation capabilities.

• 53 Personnel from Manitoba Aerospace organizations participated in CESDP organizational improvement activities. This exceeded our target of participations by 21.

INDUSTRIAL TECHNICAL BENEFITS (ITB)

Leveraging the ITB Program to strengthen the competitiveness of Manitoba SMBs

Manitoba Aerospace received a contract from NRC-IRAP to provide supports to up to 12 SMBs from Western Canada to develop capabilities and skills, and prepare them to make the business case to become suppliers of choice for ITB Obligors, Tier 1 and 2 Companies, and MNEs. The goal of this initiative was to provide assessment services and individual coaching for up to twelve SMBs from aerospace/defence; as well as other relevant manufacturing sectors.

The participants were coached on how to use innovative and results-driven tools/practices so they can effectively identify and successfully pursue Industrial Technical Benefits (ITB) and other business opportunities with Multinational Enterprises (MNEs) and create economic growth for the companies and the region. From June 2016 through March 2017, the consultant for Manitoba Aerospace worked with 12 companies that learned more about the ITB program which is part of the Federal Government's efforts to ensure investment in Canadian small to medium-sized businesses when the Federal Government purchases military equipment and supplies. Nine (9) of the companies were from Manitoba, one (1) from Saskatchewan and two (2) from Alberta.

The development focused on: understanding the value added (Canadian Content Value) of the SMB, identifying the most applicable obligors to pursue for work packages, as well as assessing and developing action plans to demonstrate competence in other key processes which are competitive differentiators.

Key Accomplishments:

• 12 companies from Western Canada participated in the ITB initiative and have developed their own Canadian Value Propositions.

• 3 B2B meetings will be set up with ITB Obligors (OEMs, Tier 1 & Tier 2) in the fall and early winter so the SMBs can highlight their accomplishments and capabilities.

PILLAR #3 INNOVATION, RESEARCH AND TECHNOLOGY

In collaboration with the Consortium for Aerospace Research and Innovation in Canada (CARIC), the Manitoba Aerospace Research and Technology Committee's (MARTC) mandate is to advance the innovation, research and technology agenda in the Manitoba Aerospace community. The primary enabler is the Manitoba Aerospace Technology Road Map (TRM).

Initially released in 2014 and revised during 2016, the TRM is the primary vehicle to communicate the technology needs and interests of the Manitoba Aerospace Industry. The Technology Road Map Summary update was released in early 2017 (insert link here), while the full Technology Road Map Report update has been compiled and will be released shortly. The TRM highlights key technologies of interest in Manitoba Aerospace in seven technology thrusts: Advanced Manufacturing, Robotics & Automation, Composites, Simulation & Modeling, Test & Certification, Space & Rockets and Unmanned Aerial Vehicles.

Following the completion of the TRM update, a survey was initiated in early 2017 of Manitoba Aerospace members to expand the TRM key technologies of interest in greater detail to define potential technology projects. The overlap in project interests provides common ground for potential collaborative research. The annual CARIC MB Research Forum (part of Manitoba Aerospace Week in June) provides a venue to bring together researchers in Academia, Research Institutions and Industry in Manitoba and facilitate additional Research and Development collaboration in these areas.

CARIC continues to play a primary role in funding current Manitoba Aerospace Research & Development projects including a $2.5M collaborative project coordinated through the Canadian Composite Manufacturing R&D Consortium (CCMRD) – now a fully recognized CARIC research partner – consisting of a consortium of aerospace companies and research organizations across Canada including Magellan Aerospace Winnipeg, Boeing Canada Winnipeg, the Composites Innovation Centre and Red River College.

Additionally, a $1.4M project to evaluate and demonstrate the application of new high performance welding technologies in aerospace light alloys (restoring the original material strength without dimensional warpage in aerostructures and components) is being led by StandardAero collaborating with the University of Manitoba, and Red River College.

PILLAR #4 PROMOTION, BRANDING, AND ADVOCACY

MARKETING AND COMMUNICATIONS COMMITTEE

The committee is made up of Marketing and Communications experts from industry as well as staff from Manitoba Aerospace. The current members of the Committee are: Committee Chair - Leslie Yakimishyn, Magellan Aerospace, Terry Trupp, Boeing Winnipeg; Don Fowler, StandardAero; from Manitoba Aerospace: Wendell Wiebe, Ellice Gan, and Barbara Bowen. We are delighted to note that Ken Webb, retired Executive Director of Manitoba Aerospace Association also sits on the Committee to continue to contribute to Manitoba Aerospace activities and events.

The mandate of the Marketing and Communications Committee is to support Manitoba Aerospace as it delivers its mission of promoting the growth of the aerospace industry in Manitoba through business development activities and workforce development initiatives.

Networking Breakfast Meetings

Manitoba Aerospace organized three Networking Breakfast Meetings between October, 2016 and April, 2017. In October, the new Aerospace & Defence Trade Commissioner, Sandy Beyko, was introduced to our members companies and the concept of Local Supplier Development was suggested to the members and received resounding support. The second Networking Breakfast meeting took place in Feb 2017 where the SMBs heard about the quality systems that must be in place to become a supplier for Boeing Winnipeg, StandardAero and/or Magellan Aerospace. In April, representatives of the procurement teams from Boeing Winnipeg, Magellan Aerospace and StandardAero each gave a presentation on their company, its capabilities and what local supplier requirement they have currently. B2B meetings took place between interested SMBs and the larger companies on Wednesday, June 7.

Contrails Newsletter

Contrails, the electronic newsletter, was published twice in 2016-2017 and the next issue will be completed in June 2017.

AAiM Day

The 10th anniversary of AAiM Day was held at Red River College – Stevenson Campus on May 26, 2016. The 2016 event was attended by over 750 Grade 6 students and teachers and was supported by 150 volunteers.

Aerospace Supplement

Aerospace Supplement was published in the Winnipeg Free Press on June 8, 2017.

Manitoba Aerospace Social Media

Manitoba Aerospace's Facebook page was launched on March 17, 2016 and we have over 500 Followers. At the end of March 2016, we relaunched our Twitter @mbaerospace and LinkedIn page [Manitoba-Aerospace] and and established a new Instagram account [Manitoba Aerospace].

Manitoba Aerospace Golf Tournament

The 2017 Golf Tournament will be held on Sept 14, 2017. The 2016 Tournament raised over $10,000 for the Manitoba Aerospace Student Endowment Fund.

Girls in Aviation Day 2016

120 girls between ages 8 to16 attended the second annual Girls in Aviation Day on Sept 23, 2016 at the Lyncrest Airport. The event was hosted by Northern Spirit YWG – the Manitoba Chapter of Women in Aviation International. The girls and their parents were introduced to a 6 different careers in aviation and aerospace. Plans are in place to hold the 2017 event at RRC – Stevenson Campus on September 23.

Canadian Space Society Annual Summit

The Canadian Space Society's Annual Summit was held in Winnipeg at the Inn at The Forks in November. Manitoba Aerospace sponsored the Young Professionals Event. Many young professionals attended to hear from industry experts, gain industry insights and learn the types of skills and qualifications the industry is looking for when hiring.

All-Stars Dinner and Awards Gala

The 2016 Manitoba Aerospace All-Stars Dinner and Awards Gala was held on November 17, 2016. Over 180 people attended, and more than $18,000 was raised for the Manitoba Aerospace Student Endowment Fund.

Mark your calendars for the 16th annual Manitoba Aerospace All-Stars Awards Dinner and Gala which will be held on November 23, 2017 at the Victoria Inn.

Manitoba Aerospace Website

The updated Manitoba Aerospace website will be launched by June 30, 2017.

A. Adams Supply (1969) Ltd. is located in Winnipeg and is a comprehensive industrial distributor of supplies for industry, construction & manufacturing. The company has a wide range of name brand products ranging from cutting tools, abrasives, industrial & construction fasteners, power tools, MRO products as well as safety supplies. A. Adams Supply operates from a 30,000 sq. ft. warehouse that serves Manitoba, Northwest Ontario and Saskatchewan.

All-Fab Packaging Solutions is a fully certified manufacturer that has specialized in designing, building and shipping wood packaging solutions for product transportation since 1970. The company has a network of professional design, manufacturing and retail locations in Winnipeg, Brandon, Regina, Saskatoon and Edmonton. All-Fab Packaging Solutions is a division of the All-Fab Group of companies, which is the company that help to construct the Children's Museum and the Skate Park at The Forks.

Centre for Aboriginal Human Resources Development (CAHRD) is a community-driven, non-profit training and recruitment organization serving the Aboriginal community. Over its 43-year history, it has operated under Native Pathfinders, Winnipeg Pathfinders, Native Employment Services, and Aboriginal Training and Employment Services of Manitoba. The focus has stayed the same: to help urban Indigenous people become employed. CAHRD and Manitoba Aerospace have been partners since 1999.

Encore Metals has been supplying specialty high grade steel and metal products to Canada & the United States since 1892. With its wide ranging product line, the company is able to serve industries ranging from aerospace, agriculture, construction, forestry, manufacturing, mining, and oil & gas. It is part of the Reliance family of companies from Los Angeles, the largest metal supply company in North America. With offices in various locations within Canada and the U.S., Encore Metals currently has a Winnipeg facility that distributes metals and alloys for the Aerospace industry.

Parenty Reitmeier has been helping businesses with translation work for the past 20 years. The company has grown from a small enterprise with a handful of employees into an award winning industry leader. Parenty Reitmeier deals with various levels of government and many other private and public institutions. The company specializes in translation for mechanical & financial sectors and has translated owner & service manuals for companies such as Polaris, Honda, Kia and Harley-Davidson.

Manitoba is home to a host of complementary world class aerospace companies that play a vital role in the global aerospace industry. Manitoba provides strategic advantages to the aerospace industry: a network of collaborating companies, a solid workforce, tailored education programs, international R&D capabilities, supportive governments, and an ideal geographic location. Together, these factors create a thriving and globally competitive business environment.

If your company is looking for a partner with access to North American markets and advanced aerospace technology, look to the Manitoba aerospace industry. If you are seeking a cost-competitive site to do business, look to Manitoba, Canada. If you need a source of aerospace component manufacturing or engine maintenance services, engine icing and other environmental testing, or composite materials manufacturing or R&D, look to Manitoba companies.
